

IP PBX

“Big Business” Phone Solutions without the Big Price

Noble® IP PBX is a robust software PBX solution for today's growing IP telephony environment. Noble IP PBX offers contact center organizations the ability to streamline their communications platform, and to improve efficiencies and reduce costs with a flexible, unified voice and data network.

Noble IP PBX offers the power of Unified Messaging combining phone, email, fax, and voicemail contacts into a single interface, including fax and voicemail delivery to the user desktop, to help your employees work more efficiently and become more productive. Noble IP PBX can be used as a stand-alone phone system. Or, it can be implemented with the Noble Contact Center Solution to provide an enterprise-wide telephony platform that unifies your call center agents and your business users to improve service and performance.

Noble Systems can help you take advantage of the benefits of a Virtual PBX with the Noble IP PBX, giving you the power of a “big business” phone system while helping you save money. We use the latest technologies to offer a flexible, scalable communication platform to bring you a solution that combines traditional PBX functionality with advanced features. Whether you need to support your call center or your entire organization, Noble IP PBX can help you reduce costs and improve operational efficiencies.

As a stand-alone platform, Noble IP PBX can help companies reduce costs and work more effectively. Everyone on the network can benefit from a wide range of advanced telephony features, such as delivery of faxes and voicemails to users directly through their email. When combined with the Noble Solution for blended outbound and inbound contacts, Noble IP PBX offers a total platform to support contact center agents and customer communication programs that is ideal for call centers with multiple sites, remote agents, and non-contact center business users, linking the entire organization with a unified, easy-to-manage system.
