- Create a Unified Environment for All Inbound, Outbound & Blended Contacts for Multiple Sites using a Centralized Management Portal and Omnichannel Voice, Email, & Web
- Keep Management Informed with Accurate Data, Agent Monitoring & On-Demand Real-Time Reporting
- Achieve Regulatory Compliance for Do Not Call and Consumer Privacy and Protection Legislation While Maintaining Productivity with our PCI-Ready Platform, Data Privacy & Contact Compliance Tools

“I would recommend Noble to anyone. **The results have been amazing.** We have increased overall productivity by 150 - 200%; lead generation is up 250%. I can manage agents more effectively – I can pull up results, see agent activity, and watch everything they do from a productivity standpoint.”

“Noble offers an **all-in-one solution.** We have improved productivity from agent activity to program management. We have **increased dials per hour and contacts per hour.** We have improved list penetration and list management & have better control of production tracking.”

Financial Services Solutions

Build Productivity with More Right-Party Contacts

The Noble communications platform uses one of the industry's most advanced dialing algorithms and superior tone and voice detection to drive productivity rates. With 95%+ answering machine detection, and busy, no answer, and disconnect recognition, agents receive only live contacts. Calendar-based appointment setting tools let you schedule meetings for qualified leads, or complete an application form and transfer the call directly for faster processing. Multiple phone numbers per debtor, account ownership and preview dialing, best time to call, and multi-line dialing also help build contact rates.

Increase Response Rates with Automated Messaging

Outbound messaging and text-to-speech tools help ensure that collectors are talking to the correct people. If a person is interested in learning more, you can transfer the call to an agent; if not, leave an automated message with a return phone number. For more efficient service, the Noble suite can be integrated with your CRM and account software to provide account information and payment options, and to record contact results automatically, without engaging agent resources.

Enable Customer Self-Service with Personalization & Interactive Tools

Automated messaging can be used to notify customers of special offers, to verify new accounts, and to send payment reminders. Self-service menus allow customers to respond immediately with automated functions, such as payment processing, make account changes, or even complete a basic application – all without requiring the help of a live agent.

Improve Debt-Recovery & Service Levels with Advanced Routing

Sales calls can be sent to more effective closers, or route calls for new and existing

accounts to different groups. Agent-specific callbacks are also supported. Digital recording tools capture orders for later verification and customers can be transferred as needed, without hanging up and dialing another number. Decisioning tools can analyze and score new applications for faster service.

Create a Unified Environment for All Communications

Agents can be assigned to handle outbound and inbound voice and non-voice channels at the same time, promoting increased efficiency. Agents can work one-on-one with customers on assigned accounts. Multi-session tools that allow agents to handle more than one interaction at a time help to improve customer service, efficiencies, and agent utilization levels.

Maximize Performance with the Dynamic Management Suite

Manage all of your collections activities with our comprehensive Management Suite. Designed in a user-friendly environment, our manager tools allow users to build scripts, control center resources, monitor real-time performance, and create custom reports, without requiring high-level IT experts. Our web-based reports and manager portal make it easy to stay on top of activities, no matter where your managers may be.

Manage Regulatory Compliance with Patented Technologies

Noble Systems has introduced an innovative, state of the art toolset for Legislative Compliance. Noble's compliance technologies include features, reports, and tools to help you manage your operations in accordance with telemarketing legislation and industry guidelines, including wireless dialing, ANI broadcasting, abandonment rates, calling hours, recording restrictions, data security, DNC registries, FTC, TSR, TCPA, PCI, HIPAA, Ofcom, ACMA, and more.

- Inbound & Outbound Contact Management with Advanced Omnichannel Queue Management to Reduce Inbound Hold Times
